

EDMONTON PUBLIC SCHOOLS

February 13, 2007

TO: Board of Trustees
FROM: B. Holt, Acting Superintendent of Schools
SUBJECT: New Locations for District Programs for 2007-2008
ORIGINATOR: C. McCabe, Executive Director

RESOURCE

STAFF: Karen Bardy, Jenise Bidulock, Deborah Brandell, Gloria Chalmers, Tana Donald, Margaretha Ebbers, Kerry-Ann Kope, Sandra Mason, Bob Morter, Stuart Wachowicz

INFORMATION

Alternative Programs

Student Program Distribution staff in Planning have been working closely with the departments of Curriculum and Programs to determine the need for new Alternative programs in the district. Provision of equity of access to alternative programs is a foundational belief underlying decisions made regarding the distribution of program choice across the district. Many factors including demand, availability of student space, impact at existing locations, condition of facilities, program integrity and transportation are considered in the process for establishing new academic alternative programs. Consultation with principals, school staff parents and central staff are integral to the implementation of alternative programs and occur frequently during the establishment process. All factors considered are dependent upon final approval by the Superintendent of Schools. Following is a summary of the new programs currently planned and proposed to open in September, 2007.

Alternative Program	New Locations / School	Superintendent Approval	Implementation Plan	Current Principal
Cogito	Location to be determined in Millwoods	Pending	K-2	

Alternative Program	New Locations / School	Superintendent Approval	Implementation Plan	Current Principal
Arts Core	Mount Royal	Pending	K-6	Elaine Ford
International Baccalaureate Primary Years Program	Coronation	Pending Approval	K-5	Roma Paul
Logos	Sakaw	Approved in 2006	K-3	S. Dzivinski
Pre-Advanced Placement	J.D. Bracco Kate Chegwin Mary Butterworth S. Bruce Smith	Approved	Grade 7	M. Cleveland W. Deys J. Bailey C. Symons
International Spanish Academy	J.A. Fife	Approved in 2006	K-1	G. Haug

Arts Core

As a result of the Sustainability Review of Mount Royal School a recommended action was for Mount Royal School to pursue the implementation of the Arts Core Alternative program in partnership with Virginia Park School. There is currently only one other school in the district that offers the Arts Core Program for students in Kindergarten to grade six. The implementation of this partnership is being explored by district staff and principals. Recommendation for approval will be made to the Superintendent before the end of March.

Cogito

The Cogito Alternative Program is the fastest growing alternative program in Edmonton Public Schools and in other areas of the Province. There are currently four elementary Cogito Alternative Program sites, at Meyokumin, Mount Pleasant, Richard Secord and Stratford schools. There are also three junior high Cogito Alternative Program sites at Allendale, Britannia and Stratford schools. Meyokumin School has received a larger than anticipated number of requests from parents wishing to enroll in the Cogito program at this school. In order to accommodate a growing demand for this program choice in Millwoods, district staff have begun working with principals at other Millwoods schools to determine a location for a second Cogito Program location. A recommendation to the Superintendent is pending approval.

Although requests have been made for a Cogito program location on the north side of the city there was not a significant demand to open a location for the coming year. The opportunity to open a North side Cogito program will be considered again for 2008.

French Immersion

The French Immersion Program has demonstrated significant growth. There are thirteen French Immersion sites across the city at both the elementary and junior high levels and two at the senior high level. Enrolment at current sites is being monitored to determine if a need to open new locations is evident.

An accommodation review of the viability of French Immersion and English programming at both Richard Secord School and Greenfield School had been completed this year. Both schools will continue to offer the French Immersion and English programs at this time as there continues to be a demand in this area of the city.

International Baccalaureate Primary Years Program

As a result of the Sustainability Review of Coronation School a recommended action was for Coronation School to pursue the implementation of the International Baccalaureate Primary Years Program. Coronation School is currently in partnership with Westminster School for the International Baccalaureate Middle Years Program. The addition of the International Baccalaureate Primary Years Program would provide continuity for this program choice from Kindergarten to grade nine in the west end of the city. There is currently only one other school in the district that offers the International Baccalaureate Primary Years Program for students in Kindergarten to grade five. The school will need to make application to the International Baccalaureate Organization in the near future. Appendix I outlines three Authorization phases that Coronation School will be required to complete: **Phase 1 – Consideration Phase** (duration about 6 months), **Phase 2 – Candidate Phase** (duration 1 to 2 years) and **Phase 3 – Final Phase or Application Phase** (duration 6 to 12 months) Based on previous school's experiences, it is anticipated that it will take up to three to four years for Coronation School to receive full accreditation from the International Baccalaureate Organization. Recommendation for approval of Coronation perusing the accreditation of the Primary Years program will be made to the Superintendent before the end of March.

International Spanish Academy

Further expansion of the International Spanish Academy program was planned for the North side of the city. J.A. Fife School was approved to implement the International Spanish Academy pending enrolment in the spring. Due to inadequate enrolment the program did not open. A commitment was made to advertise the program at J.A. Fife School again this year. The program will be advertised as Kindergarten to grade six to determine demand. Implementation will be dependent upon enrolment in the spring. If the program does not open it will be recommended that the designation be removed. Planning will continue to monitor demand and revisit a location on the north side if warranted in the future.

Logos

There are currently over 400 students from the Millwoods area choosing other Christian Programming. With continued growth to the east and south of Millwoods it was determined that there was a demand to locate a Logos Alternative Program closer to where students live to provide more equitable access to this program choice and to provide a new alternative program choice in Millwoods. The Superintendent approved Sakaw School the new Logos Elementary site for 2006, however, due to low enrolment the program did not open. A commitment was made to advertise the program at Sakaw School again this year. The program will be advertised as Kindergarten to grade six to determine demand. Implementation will be dependent upon enrolment in the spring. If the program does not open it will be recommended that the designation be removed and Planning will continue to monitor demand and revisit a location in Millwoods if warranted in the future.

Pre-Advanced Placement

Pre-Advanced Placement is the newest alternative program choice at the junior high level. Several schools have expressed interest in implementing this program for their students. Last

year Highlands School was also approved to begin implementing the Pre-Advanced Placement program for 2006 in addition to the three schools that were identified as Pilot Sites including Dan Knott, Parkview and Rossllyn schools. The Pre-Advanced Placement Alternative program will expand for 2007-2008 school year to include, J.D. Bracco, Kate Chegwin, Mary Butterworth, and S. Bruce Smith schools.

Special Education

Student Program Distribution prepares a forecast for new special education district classes in February, however, this work is ongoing and new locations are often not confirmed until April or May when new special education students requesting a district site are identified. New classes are established in response to demand for additional student placement in special education programs. Criteria that are considered include equity of access for students, availability of student space, impact on existing programming in the school, condition of facilities and transportation. Consultation with school principals and other district staff are ongoing during the process for determining new locations. Distribution of all new special education district classes are dependent on approval by the Superintendent.

Long term planning for the distribution of special education district centres includes examining trends and monitoring enrolment in order to create feeder patterns to provide continuity in programming wherever possible from Kindergarten to grade twelve and to provide programming for students closer to home and in schools of choice.

Special Education Program	New Locations / School	Superintendent Approval	Plan for Implementation	Current Principal
Challenge at Junior High	Hillcrest Riverbend	Approved	Grade 7	D. Robertson K. Goudreau
Early Education	Locations in Millwoods and city centre to be determined	Pending	Year one students	

Behaviour and Learning Assistance

Planning continues to examine trends in enrolment and create feeder patterns and will make recommendations to include accommodation of Division I and II students in each district centre. This will provide greater continuity and stability for students requiring this programming option.

Challenge

Last year D.S. Mackenzie School was identified as a Challenge district centre for junior high. Due to the high demand for this type of program choice in the south area of the city, Riverbend School has been approved to implement the program beginning at grade seven for the 2007/2008 school year. Hillcrest School has also been approved to offer this program choice as a result of Parkview School phasing out the Challenge program in favour of the Pre-Advanced Placement alternative program.

Early Education

Presently, Millwoods does not have an Early Education site program resulting in over 100 students aged 3 1/2 - 5 1/2 leaving Millwoods to receive programming in other areas of the city. The goal of opening a new location in Millwoods would be to provide more equitable

access to programming for Early Education students. Consultation with Principals and site visits of schools with Early Education and/or Outreach programs is underway.

Increasing demands for Early Education programming in the north side of the city is exceeding capacity at some district centres. Opportunities to reduce Early Education intake at some locations and designate new locations in the city centre are being explored. Consultation with district staff and principals will continue. Any recommendations must be approved by the Superintendent and Alberta Education.

Interactions

Projected increase in numbers of students with Autism or Autism Spectrum Disorders who request placement in an Interactions district centres may result in increased numbers of classes or sites across district.

Literacy

Changes to criteria and funding for students identified by Alberta Education as Learning Disabled will not result in district centre expansion or reduction for 2007-08, however long term planning may result in overall reduction of Literacy sites in upcoming years.

Strategies

Changes to criteria and funding for students identified by Alberta Education as Learning Disabled will not result in district centre expansion or reduction for 2007-08, however long term planning may result in overall expansion of Strategies sites in upcoming years due to anticipated increase in numbers of new to district students who will meet new criteria for Strategies eligibility.

Edmonton Public Schools offers a variety of quality education choices at all schools in the district. Open boundaries support one of our core philosophies: parents should have choices as to where they send their children for their education. In order to meet the unique learning needs of individual students, the district offers a number of alternative and special education programs at different locations throughout Edmonton. (Appendix II)

KK:cp

Appendix I: International Baccalaureate Primary Years Programme (PYP)

Appendix II: Edmonton Public Schools Quick Guide – 2007 - 2008

INTERNATIONAL BACCALAUREATE PRIMARY YEARS PROGRAMME (PYP)

Is an integrated approach to instruction focused around: Who we are, Where we are in place and time, How we express ourselves, How the world works, How we organize ourselves and Sharing the planet.

Authorization Process Occurs in Three Phases:

Phase 1 – Consideration Phase (duration about 6 months)

Includes:

- accessing background documents
- sending staff and administrator to PYP Level One workshops
- gaining support from staff, parents and district
- developing 3-year strategic plan for introduction and implementation
- working in vertical teams
- starting development of units of inquiry in collaborative grade level teams

Can proceed to Phase 2 if requirements met (e.g., at least one teacher at each grade level and school administrator has attended Level 1 Workshop, a coordinator has been identified, school submits PYP Application Form Part A, etc.)

Phase 2 – Candidate Phase (duration 1 to 2 years)

Includes:

- hosting a 2 day visit by a PYP consultant
- working towards attaining the PYP standards (described in their documents)
- continuing implementation of the action/strategic plan
- communicating with the PYP consultant as stipulated
- installing systems to facilitate ongoing discussion and monitoring progress
- continuing development of program of inquiry and writing units in collaborative teams

Can proceed to Phase 3 if requirements met (e.g., Assemble PYP Application Form, Part B, program of inquiry is complete, at least 3 of the required 6 units of inquiry have been taught at each grade level, an additional language is taught, most teachers have received IB authorized training – including at least one teacher at each grade attending Level 2 workshop and 1 or more teachers have attended a 5-day summer workshop, etc.).

Phase 3 – Final Phase or Application Phase (duration 6 to 12 months)

Includes:

- submitting PYP Application Form, Part B by June 1
- continuing teacher training so that all teachers trained by time of authorization visit
- hosting an authorization visit by and IBO delegation

Successful completion of phase 3 leads to authorization. All authorized schools undergo Program Evaluation, which includes a self-study and an evaluation visit, three years after authorization and every 5 years after that.
