INFORMATION

The *Edmonton Public Schools Annual Education Results Review 1998-99* (Attachment I) is designed to highlight results and progress achieved by the district based on the district's annual results review process. The review aggregates results already reviewed by trustee sub-committees and provides summary information regarding the key accomplishments and areas of strength and improvement. Since the review also serves as the annual education results report to Alberta Education, it includes information in response to provincial requirements.

Copies of the *Edmonton Public Schools Annual Education Results Review 1998-99* will be made available to schools, school councils, and central services departments. The report will also be placed in public libraries and made available to the community through the district's Internet web site: <http://www.epsb.edmonton.ab.ca>.
